DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 21-28 and 37-43, drawn to an apparatus and method of prioritizing drive of a snow-trail grooming vehicle, classified in class 37, subclass 197.
- II. Claims 29, 30, drawn to an apparatus and method of suggesting adjustments for drive of a snow-trail grooming device, classified in class 37, subclass 219.
- III. Claims 31, 32 and 44, drawn to an apparatus and method for measuring resistance of the snow for a snow-trail grooming device, classified in class 37, subclass 196.
- IV. Claims 33-36, drawn to an apparatus and method of measuring speed of a snow-trail grooming device, classified in class 37, subclass 196.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions do not rely upon each other for operation and can be used independently of each other.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III or IV, restriction for examination purposes as indicated is proper.

Art Unit: 3671

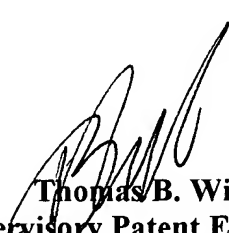

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
